

Investment Opportunities: NOC Approved Projects 2009

Project Title/ID: Electronic Support Facility

Project Type: Could be direct or Indirect

Sector: Services

Project Concept:

To build an autonomous Depot-level workshop support facility for the obsolete electronics systems. This is a service-based project, to include the following:

- Obsolescent management and resolution
- Repair of systems
- Maintenance
- Rapid fault finding
- Module testing
- Fault screening
- Procurement and logistics

Economic Benefits:

1. Technology transfer to Kuwait:

Creation of a Level-3 & Level-4 support facility which means fault-finding and repair at the circuit board level by replacing individual components in a main workshop facility. This includes software loaded devices and large digital components.

2. High skill jobs created for Kuwaitis:

The establishment of electronic support facility will create high technology jobs for Kuwaiti nationals .with an estimate of 10 to 15 jobs to be created initially, those jobs shall cover all aspects of the of the operation including:

- Specialist Procurement.
- Technical /Engineering.
- Managerial.
- Sales.
- Logistics.

3. Training and education provided for Kuwaitis:

All skills and knowledge required to operate the equipment and the know-how shall be transferred to the Kuwaiti to be recruited.

Estimated Investment

The investment required to establish and operate an Electronic Support Facility is equivalent to KD 6,545,680/-

Tentative Multiplier

Not available.

Approval date

September 1, 2009
