Project Title/ID: Modern Dairy Cattle and Green Fodder Farm

Project Type: Indirect

Sector: Agricultural

Project Concept:

The idea of the project is the establishment of a farm for the breeding of cattle and for the production of milk and red meat in addition to the cultivation of animal feed, specifically (jet). This type of feed is chosen for its use in feeding farm animals in addition to its relevance to the climate of the State of Kuwait.

Economic Benefits:

1. Creation of High skill jobs for Kuwaitis:

The project will create 42 job opportunity for Kuwaitis, in the field of veterinary medicine and agricultural engineering. In addition to other jobs in different areas.

2. Provision of training and education to Kuwaitis.

- Training in maintenance of equipment and agricultural machinery.
- Training in warehouse management and general information about agricultural products, dairy products and proper storage techniques.

3. Economic value added:

The project will promote agricultural production in Kuwait and in addition to agriculture based industries, it will help achieve Kuwait's self sufficiency in red meat and dairy products.

Estimated Investment

The initial capital cost of the of the project is KD 4,180,715/-
